German	Polish	

SOME OF OUR VALUED CUSTOMERS:

Translation

PLG's experienced professional translators speak all commonly used languages in the world:

Chinese, Japanese, Korean,
Spanish, French, German, ...

(See the complete language list on the other side)

Our top quality translation services cover all fields including the legal, banking, industry, technology, medical and education fields, just to name a few.

We translate business cards, product manuals, organization brochures, print ads, business correspondence, trade articles, and numerous other publications ...

Whenever applicable, our translations are performed using TRADOS software. This translation memory capability allows us to provide you with translations that are highly consistent with a shortened turnaround time as well as lowered costs.

PLG's project management approach guarantees translation projects to be finished on time, on quality and on cost.

Typesetting

Accurate and culturally correct translation will only have impact if it is presented perfectly. We pursue such perfection.

PLG's in-house and technology driven typesetting capability has provided top quality typesetting services since 1994. We are masters of the following DTP applications:

**FrameMaker, QuarkXPress, InDesign,
PageMaker, Illustrator, Photoshop,
CorelDRAW, Freehand, Powerpoint, ...**

Our translation-memory assisted and XML-enabled typesetting solution significantly lowers project cost and time.

We specialize in character language typesetting by speaking the languages and possessing font development skills for multiple languages.

PLG performs typesetting on both PC and Mac platforms.

Software Localization

For any software applications, PLG can localize it for audiences in other locations around the world. PLG's software engineers have many years of programming experiences in various operating platforms and systems. This experience naturally enables us to localize a line of software applications including:

- **C/C++/SDK/MFC;**
- **.Net with C#, C++ and VB.Net;**
- **VB 6;**
- **Web Application in ASP and ASP.Net;**
- **Flash;**
- **Applications in Multi-language Operating Environments**

Your localized custom software will remain functionally the same. However, the new interface will now allow users to use the tool more easily and accurately according to their preferred language.

Food and Cosmetic Product Labeling Compliance

Food and cosmetics product labeling compliance can be a formidable trade barrier for most foreign manufacturers. PLG's experienced experts translate labels, adapt the artwork and certify the compliance from target countries. PLG's labeling compliance services cover China, Taiwan, Japan, Mexico, Canada and most European countries.

About us

Established in 1994 in a suburb of Chicago, IL, PLG began its journey to provide its valued customers value added services in general and technical translations, non-English language typesetting and graphics design. Leveraging our language and graphics advantages, we later added software localization and food product labeling compliance services in 2000. We are now a full service provider of translation based products with high quality, competitive cost and swift turnaround time.
